

# MACRON

## hosereel cabinets

### Cabinet design

Space saving compact design with hose reel and cabinet door that swing open a full 180° for ease of access and use.

Macron hose reel cabinets can be surface mounted or recessed with architrave and are finished in red epoxy powder coat as standard. The cabinets are universal with left or right hand opening and four knock-out water entry points per cabinet.

### Cabinet construction

Macron hose reel cabinets are constructed from 16swg zintec steel with a red recessed latch type handle for an attractive flush finish. They carry a red and white 'Fire Hose Reel' information label above the latch and are easily installed with four M12 bolts at the rear of the cabinet.
