

Saracen

Where fire fighting is less frequent or intensive, or for private sector applications as opposed to public sector work, Saracen offers an affordable alternative to Viking without any performance penalty.

Macron's Saracen hose, like Viking hose, is a high quality product, constructed in the same layered way from the same materials, though without the heavy protective ribbing used on Viking. This means that less nitrile-PVC rubber is used, making Saracen somewhat lighter.

Couplings

All types are available including Standard Industrial, British Instantaneous, German Storz, Dutch Storz, American NSFHT, French Guillemin, or Symmetrique. All couplings can be supplied in either light alloy or gunmetal.

Specifications

Saracen fire hoses are manufactured in accordance with BS 6391:Type 3 1983.

features

- ▶ Excellent heat resistance
- ▶ Oil and chemical resistant
- ▶ Weather resistant
- ▶ Maintenance free
- ▶ Easy to repair

Composition	
Woven textile jacket	All polyamide/polyester
Lining	Nitrile-pvc rubber
Outside cover	Nitrile-pvc rubber
Colour	Red (standard) Blue (subject to min. quantity) Yellow (subject to min. quantity)

Saracen Fire Hoses - Technical Data				
Internal diameter		Weight +/- 10% excluding couplings	Maximum advised working pressure	Average burst pressure
mm	ins			
38	1.5	220 gr/m	22.5 bar	55 bar
45	1.75	250 gr/m	22.5 bar	55 bar
52	2.0	300 gr/m	22.5 bar	55 bar
64	2.5	370 gr/m	22.5 bar	50 bar
70	2.75	480 gr/m	22.5 bar	50 bar

How to specify: Product Code + meterage + couplings. Lengths available up to 30 metres
